

BULK WHEY

Bulk Whey

3 x BULK WHEY Blender Shaker Bottle - (28oz/795ml)

£6.00

We now stock our own label (BULK WHEY) (28oz/795ml) [BlenderBottle](#) shakers!

Unlike most grid shakers on the market these new shakers have no grid under the lid. Instead they

ingeniously use a wire ball inside for mixing.

And it really does act like a regular blender!!

We've tried them ourselves and they certainly do mix powders much better than normal grid-shakers

Additionally there's less cleaning as there's no grid. Just rinse the shaker with the ball still inside!

These clever new shakers aren't just great for better mixing...they're also extremely sturdy unlike so many flimsy shakers on the market today!

There's no more checking to see if it's screwed on correctly. It does...first time, every time! No gaps means no more leaks! The cap on top also closes tightly for perfect storage so no more annoying messy leaks there either!

All-in-all we feel this is a really great new product and if you're someone who prefers shakers to using a blender this really is a must have!!

We know you'll LOVE them!

These are great! No leaks, if it's screwed on properly & the ball works well to break up any lumps in the powder. It also has a slightly bigger volume than most other shaker bottles which helps with

mixing
